Deconcentration Policy

It is the policy of the Doerun Housing Authority (DHA) to house families in a manner that will prevent a concentration of poverty families and/or concentration of higher income families in any one development. The specific objective of the DHA is to house no less than 40% of its DHA inventory with families that have income at or below 30% of the area median income by public housing development. Also, the DHA will take action to insure that no individual development has a concentration of higher income families in one or more of the developments. To insure that the DHA does not concentrate families with higher income levels, it is the goal of the DHA not to house more than 60% of its units in any one development with families whose income exceeds 30% of the area median income. The DHA will track the status of family income, by development, on a monthly basis by utilizing income reports generated by the DHA's computer system.

To accomplish the deconcentration goal the DHA will take the following actions:

- A. At the beginning of each fiscal year, the DHA will establish a goal for housing 40% of its new admissions with families whose incomes are at or below the area median income. The annual goal will be calculated by taking 40% of the total number of move-ins from the previous fiscal year.
- B. To accomplish the goal of:
 - 1. Housing not less than 40% of the DHA inventory on an annual basis with families that have incomes at or below 30% of area median income, and
 - 2. No housing families with incomes that exceed 30% of the area median income in developments that have 60% or more of the total household living in the development with incomes that exceed 30% of the area median income, the DHA's Tenant Selection and Assignment Plan, which is a part of this policy, provides for the utilization of "Local Preferences" in regard to the selection of applicants to meet the priorities of the policy.
